EDUCATION

SVKM's Dwarkadas J. Sanghvi College of Engineering

Mumbai University

Bachelor of Technology

May 2027

Major in Artificial Intelligence and Machine Learning

Cumulative GPA: 9.1/10

WORK EXPERIENCE

EY

May 2026 - Present

Generative AI & Agentic AI Engineering Intern

- Collaborated with senior AI consultants and architects to design, deploy, and optimize scalable AI systems, driving real-world business impact through cloud platforms and advanced AI engineering practices.

IPAGE UM SERVICES PVT LTD

October 2025 - January 2026

AI Agent Intern

- Built AI-powered automation agents for **intelligent email replies** and **social media** workflows, leveraging **n8n**, LLMs, and vector databases to enable **2-3x faster content creation** and significantly **reduce posting turnaround time** across Instagram, LinkedIn, and X.
- Enhanced engagement workflow efficiency through automated pipelines, while gaining hands-on experience in AI agents, workflow orchestration, prompt engineering, and vector search.

CORE PROJECTS

ASTRA (Asynchronous Secure Training with Robust Aggregation) [github](#)

- Developed ASTRA, a production-ready distributed Federated Learning platform enabling **privacy-preserving model training** with **asynchronous aggregation** and a real-time full-stack dashboard.
- Engineered a scalable PyTorch and FastAPI backend featuring **differential privacy (DP-SGD)**, **Byzantine fault tolerance**, and HuggingFace/LoRA integration, fully containerized with a Next.js frontend.
- Bridged ML research to production by designing **robust adversarial defenses**, **dynamic trust-scoring systems**, and **end-to-end MLOps pipelines** for distributed environments.

Kaito-AI (Intelligent Search & Document Analysis) [github](#)

- Built an intelligent AI assistant using **LangChain**, **LangGraph**, and LLMs, integrating real-time **web search** and Retrieval-Augmented Generation (RAG) with **semantic vector search** using HuggingFace embeddings and ChromaDB.
- Developed a **multi-threaded** Streamlit chat interface with **SQLite**-based persistent memory, enabling **context-aware conversations**, session management, and seamless **mode switching** between search and document-based workflows.

Kaito-Model (GPT-2 Style Transformer from Scratch) [github](#)

- Built a GPT-2 inspired transformer model using **PyTorch**, implementing core components like **masked multi-head self-attention**, **positional embeddings**, **feedforward layers**, and **causal masking** for next-token prediction, following the original transformer architecture.
- Designed and optimized the full training pipeline, including **dataset preparation** using sliding windows, tokenization, batching, loss computation (cross-entropy), and text generation with top-k sampling for controlled decoding.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL

Frameworks: FastAPI, Tensorflow, Keras, Pytorch, OpenCV, Langchain

AI Tools: HuggingFace, MLFlow, Docker, AirFlow

Databases & BI: Supabase, MySQL, Pinecone, MongoDB, PowerBI

ACHIEVEMENTS

Finalist, Quasar 4.0 National level Hackathon at VPPCOEVA, Mumbai

January 2026

Ranked Top 10 in Megahack 5.0 National Hackathon (out of 250 teams)

March 2025

Finalist, Innovize Hackathon at VJTI, Mumbai

Feb 2025

CERTIFICATES

- Master the theory, practice, and math behind Data Science, Machine Learning, Deep Learning, NLP with end to end projects.
- Tensorflow for Deep Learning bootcamp Certificate.

CO-CURRICULAR ACTIVITIES

Training and Placement Co-ordinator, DJSCE

Sept 2025 - Present
